

ESTHER NWAKWOKE CHIOMA

UD77060ED86263

Programme:- PHD OF EDUCATION

Assignment Title:-

Analysis of work Goals:-

Or a specific work project

**What do you do at work and what tools do you used to
achieve your goals?**

How do you overcome challenges?

Introduction

I am a teacher, according to John Dewey the education reformist:- It is an ability to assist learners in growth and development.

This means I attend to students needs in the classroom, I also share their experiences and feelings, and I make specific interventions to help them. I always lead students to their passage of working and succeeding. I share knowledge which I gain from my own education which is usually organized within a discipline. I prepare lesson plan, assist the students in their studies to learn and conceptualize through their cognitive affective and psychomotor domains.

I assign homework and test, I comprehensively evaluate their learning process, I grade them and document their progress.

What I do at work:-

My work as a teacher is very elaborate. I use my teaching skills with exceptional competency. This calls for total commitment, I don't wait to be referred as an amateur, or inexperienced before I do my job.

According to a professional writer and an educationist Schwartz (1993). It is more of attitude to work than diplomas and certificate, I make my students realize their potentials and I am glad I did. I know that academics is very important because if I am not informed very well, I cannot give and share knowledge. This is why, I always upgrade my knowledge so that I can be able to share knowledge. I attend seminars too, this makes me to teach my students with wide spread and variety of subject matters.

It is necessary to master the teaching and learning content, maintain currency competence and versatility if possible.

Teaching the students sharing knowledge and experience with them and helping them solve the daily problems encountered while learning motivates me as teaching it, makes me have a good attribute to my personality and service.

I am emotionally stable and healthy, this helps me to handle erring students in measured and controlled way.

I maintain cordial relationship with my fellow workers so that we can work in harmony for the benefit of the students.

I respect constituted authority. The success of the students that I teach is my success and I am empowering the students to succeed the quality strategy in that the students will have knowledge, this will make them to replicate what I have taught them.

I always work hard on the individual differences of the students that I teach, I always try to reinforce the students capabilities , academically, skilfully, morally and otherwise. Whenever I teach my students I am motivated and the students are motivated too because I help them to grow academically and morally.

Tools I use to achieve my goals as a teacher:-

- **Instructional tool:**

First of all, I identify my instructional mode tools which is face to face instruction and it is also called in – person – instruction. This helps me to know the stages of learning of all the students and their capabilities. I always inspect and supervise them which they are learning.

- **Collaboration tools:**

This tool helps me to collect and get the students together for teaching and learning processes. The students were instructed not to miss any of their lesson so that they will not loose out.

- **Organizational tool:-**

This tool helps me to define my expectations, state my objectives, set my content, my evaluations home works and feedback.

- **Improve t skill tool:-**

This tool helps to bring in motivation- which might be extrinsic or intnsic to make the student to learn more and sustain the interest either for immediate gain or extended gain.

- **Time table tool:-**

This tools is used to draw a useful tirae for teaching place, so that all aspects of the syllabus will be covered at the appropriate time. I am always time conscious and regular with the students.

- **Grading tool:-**

This tool is used to grade the students according to their merit positions and keep them class.

- **Homework/assignment tools:-**

This tool help to access the students performances H is part of the progressive evaluation, this will help to elicit feedback.

- **Exam assessment tool:-**

This tool could be standard exam, research essay, or multiple – choice questions.

- **Feedback/ Pulling tools:-**

This tools will help the student to report back, if the content and style of delivery in interesting or otherwise, so that there could be review and progress.

How to overcome the challenges that in a teaching situation:-

- Check on regulations and guide for the lesson.
 - Brainstorm with the student and discuss with colleagues.
 - Make use of the school rules, regulations and policies.
 - Make the students to be occupied, and be creature in their own little ways.
- Address challenge in the classroom with a sense of human to put the challenges in perspective

- Understand the different learning challenge among students. Such as family problems, bullying, lack of fund, lack of effective communication lack of discipline etc. And treat them as they appear among the students way of life.
- Then getting enough about everything concerning my teaching career. Helps me a lot in taking care of challenges at teaching and learning process.

Conclusion:-

In conclusion, it is very important to provide for students basic technology literacy for everyday ling and to stimulate certainty and innovation, by planning teaching, strategies, utilizing human resources and material assets.

All these are used to accomplish specific classroom objectives.

Also in helping to achieve these, entire one should evaluate every students behaviour change and performance. There should also be a provision for essential feedback to teachers and students for any necessary modification. There should be progressive learning both for teacher and student.
