Questions/Answers

Q 2) Provide a short summary of the concepts or topics you learned about today" (minimum 300 characters)

A 2) Today I learned about agricultural certification and its role in sustainable farming, environmental protection, food safety, and quality assurance. I also learned how standards, inspections, and traceability help build trust between farmers, buyers, and consumers. Examples include organic certification, Global GAP, Fairtrade, and Rainforest Alliance.

Q 3) What is the most important concept(s) that you gained for today's Live Class? (minimum 300 characters)

A 3) The most important concept I gained is that agricultural certification is more than receiving a certificate. It is a process that helps farmers improve their practices, protect the environment, treat workers fairly, and produce safer food. Certification can also build consumer trust, improve market access, and help producers receive better prices.

Q 4) How would you apply what you learn today to improve your life of work? (minimum 300 characters)

A 4) I will apply what I learned by teaching students how to use safe and sustainable farming methods in the school garden. I will show them how to keep simple records of planting dates, fertilizers, pest control, and harvesting. I will also share these practices with parents and community farmers. This can help them protect the environment, improve food safety, and prepare their products for certification

Q 5) Independent Research: AIU Live Classes are a starting point for further learning beyond the class. Search similar content either online or in the AIU online library and review it then share the name or link here. If its from AIU Library copy the Source or ISSN, [show me how?](#) (can be a video, academic publication, web site. lecture or book) (minimum 10 characters)

A 5) <https://globalgap.org/about/impact-areas-and-claims/environment/>
