Questions/Answers

Q 1) I hereby affirm that I have viewed the class "Work Experience in Agriculture" in its entirety. I have already or will shortly complete 1 to 2 hours of self study, research, reading, reflection and/or application of the concepts/skills presented using the AIU online library or other mediums.

A 1) Yes

Q 2) Provide a short summary of the concepts or topics you learned about today" (minimum 300 characters)

A 2) This class focused on work experience in Agronomy and the importance of audits, standards, regulations, and certification within agricultural businesses. I learned how agricultural companies are inspected to ensure they follow required standards such as organic farming and GLOBALGAP regulations. The class also explained the certification process, including reviewing documents, monitoring compliance, and ensuring companies meet agricultural quality and safety requirements before certificates are issued.

Q 3) What is the most important concept(s) that you gained for today's Live Class? (minimum 300 characters)

A 3) The most important thing I learned from this class is the importance of structure, planning, organization, monitoring, and accountability within agriculture projects and programs. As a general education teacher, I started agriculture activities with students who had physical and mental challenges and introduced practical learning experiences through the school garden and after-school programs. I am still working on encouraging students who are interested in appreciating agriculture and practical skills. This class helped me become more serious about properly organizing projects, monitoring progress, and maintaining accountability. I will discuss these experiences more deeply within my essay.

Q 4) How would you apply what you learn today to improve your life of work? (minimum 300 characters)

A 4) I can apply what I learned by improving how I approach agriculture projects, organization, and accountability within both school and community activities. As a general education teacher, I started agriculture activities with students who had physical and mental challenges by taking them into the school garden and introducing practical agriculture experiences. I also organized after-school agriculture and community service programs, which are continuing today. Through this course, I now appreciate even more the importance of proper planning, accountability, standards, and project organization within agriculture. This knowledge will help me strengthen future agriculture projects while continuing to encourage students to value agriculture, teamwork, and practical learning experiences.

Q 5) Independent Research: AIU Live Classes are a starting point for further learning beyond the class. Search similar content either online or in the AIU online library and review it then share the name or link here. If its from AIU Library copy the Source or ISSN, [show me how?](#) (can be a video, academic publication, web site. lecture or book) (minimum 10 characters)

A 5) https://www.globalgap.org/?utm_source=chatgpt.com
