

I will mention the people who helped me in my thesis:

Dr. Jamal abolverd. Istanbul university

Dr. Omar al Omar. Delaware university

Dr. freddy- Atlantic international university

A brief summary of the thesis:

**I will try to go in-depth about the need for this subject since I consider it the core one in all sectors of life levels.**

**Critical Thinking enables us to analyze, assess and improve our way of thinking in critical situations so we can think correctly under pressure and can reach good solutions even the pressure is lasting. So our skills of thinking in critical situations will be improved if we learn critical thinking in a professional way.**

**This course is very important for me since after the end of the conflict in Syria we will work night and day under stress and pressure. So we need to learn how to get solutions in critical thinking circumstances.**

Critical thinking

A Final course Presented to  
The Academic Department  
Of Human Social Studies

For the Degree of doctor of Intelligence and security

ATLANTIC INTERNATIONAL UNIVERSITY

## General Structure of a Paper

### Table of Content

- DEFINITION
- INTRODUCTION TO BODY OF THE THESIS
- DISCUSSION OF THE GOAL OF THE THESIS
- METHOD OF COLLECTING AND ANALYZING
- STRATEGY AND TECHNIQUES
- ANALYSIS OF THE RESULT
- SUMMARY
- BIBLIOGRAPHY.

## **definition**

Critical Thinking enables us to analyze, assess and improve our way of thinking in critical situations so we can think correctly under pressure and can reach good solutions even the pressure is lasting. So our skills of thinking in critical situations will be improved if we learn critical thinking in a professional way.

## **Introduction to the body of the thesis**

I would scope on this course in which critical thinking will help me in rebuilding Syria under the big pressure we will face after the mass distraction that happened by the military conflict in 2011.

We need to think faster and critically to solve the upcoming problems we will see in the Syrian community at all levels of life. If we will not use this kind of critical thinking we lose a lot of time to find solutions and we will waste every minute we will need to re-organize all the governmental departments and another organization will be involved in making the country process and developed to modern standards.

- **DISCUSSION OF THE GOAL OF THE THESIS**

- The basic sectors we have to concentrate on for critical thinking are the following:
- •finishing and subjects,
- •from where you get the information and real ideas,
- •professional way of information collection,
- •the belief that makes that reasoning could be achieved,
- •to make sure that the concepts are in use.

**In Syria as I mentioned they have no background in critical thinking so they depended on the old fashion of old ideas on how to control the country.**

**If they tried to improve their rules of power they should focus on creating new ideas on how to go in parallel with the actions happening around Syria, especially during the Arab spring.**

**If they did this they will be able to have good tools to improve the citizen's needs according to the modern and civilized country, for example, UAE, and at the same time create new ideas to structure new rules of the power to strengthen their political position in the area.**

Critical thinking it's a mental process that makes the ability easier to understand concepts, original ideas, and use a logical approach to solve problems.

## The Strategies for critical thinking

- before you begin to think as a critical way try to talk about your problem with someone else.
- to increase your comprehension, try to read about new ideas which you did not know before relating to your problem to solve it.

Using critical thinking ensures that you use the best thinking you are able to think about the needed issues you are facing under any kind of pressure or stress situations.

As we have many choices to make our road map of thinking, so we must choose the best choice decision after studying all the angles of the situations to be solved in a perfect way.

We must clarify thinking, pin it down, and give it a specific meaning

- **METHOD OF COLLECTING AND ANALYZING**

Because of the mega changes happening every day and the relationship between the countries change also change according to mutual advantages and to make more improvement in the economy, culture, and exchange of intelligence database and information to secure the international and national security in all fields of life like securing the citizen's life.

## Strategies for Clarifying Your Thinking

- State one point at a time.
- Elaborate on what you mean
- Give examples that connect your thoughts to life experiences

To Clarify Other People's Thinking, Consider Asking the Following

- Can you restate your point in other words
- Let me tell you what I understand you to be saying.

You have to concentrate on the following criteria and ask yourself:

- I concentrate on the main problem or task?
- How is this related to the problem?
- information referred to relate to the problem or task directly?
- my attention in which way focusing in?
- I'm I concentrating on unrelated matters?
- we must focus on the facts that actually will help us answer the question?

A lot of new ideas should be created under the critical situation we will face after the big impact happened there and the big destruction occurred on all levels of life like poverty, homelessness, changes in the behavior of the Syrian people especially the children and many other objectives should have a new idea to deal with the new destroyed country and how to rebuild everything in a modern way where critical thinking is really needed because we need to accelerate rebuilding the country as fast as we can under critical situations.

- **STRATEGY AND TECHNIQUES**

**I focused on a strategy to conclude all the aspects needed for the thesis subject concerning definition, types, international analysis, and techniques.**

The gathering of information can be complex. Focus on the next detail.

- Focus on Individuals
- Focus on Associates
- Focus on Relatives
- Focus on Employers
- Focus on Businesses
- Focus on Corporations
- Focus on Educational records/background

## **ANALYSIS OF THE RESULT**

The Analysts must have a hypothesis in the analysis structure, and then they can start analyzing the information:

1. *Focus on Group information*
  2. *Focus on Financial information*
  3. *Focus on how to improve the educational background of the employee*
  4. *Focus o making the employee feel safe in case of an unexpected accident by security and health insurance.*
- 

## **Components of a profile**

- Focus on Age, sex, race
- Focus on Marital status
- Focus on the Level of intelligence
- Focus on Sexual adjustment
- Focus on the Social adjustment
- Focus on Appearance
- Focus on Employment history
- Focus on Emotional adjustment
- Focus on Work habits

- Focus on Personality/characteristics
- Focus on Motive
- Focus on Lifestyle

### General Recommendation

### **Recommendation**

- Understand the "How Will it Affect Me?" Principle.
- Never Package a Negative Change as a Positive One.
- Embrace the Change Cycle.
- Watch Out for the Underminers.
- Patience is a Virtue.

ALSO, FOCUS ON THE FOLLOWINGS:

1. Present a solid business case to gain buy-in. ...
2. Create a roadmap. ...
3. Gather data for evaluation. ...
4. Communicate. ...
5. Monitor and manage risk. ...
6. Celebrate success. ...
7. Continuously review and improve your operation process

- **All the above-mentioned criteria will help the intelligence to secure the process in all departments and organizations to make sure all the employee doing their duties for the mutual benefit of the country and to raise the income of the employee using modern technologies in monitoring and executing.**

## summary

### **I would scope after my research and study for this subject on the following:**

- A political science study and intelligence study will let us deal seriously with the reflection of political actions around us. And understand more about authority democracy, freedom, and further concepts that represent the fundamental political values and the essential well-educated in intelligence to protect our countries and respect the principle of humankind.
- That is why I want to learn how to get professional academic information and basic about the political process and how to structure a new intelligence organization chart correctly to secure the people and national security and how to cooperate with other intelligence departments around Syria and the international community to achieve mutual benefits for all the parties.
- **When we learn in an academic way how to gather information, analyze, evaluate and get results according to the intelligence database about the individuals we will be able to start catching the first line of improving individual capabilities to expand our knowledge to the larger network of the whole group of employees working for many purposes and in many departments, under the pressure they will face after the conflict and they really need to learn critical thinking in professional way.**
