### **ACTUALIZATION**

In my case study, I want to be able to create new ideas about solving the problems because of the conflict in Syria which started in 2011.

A lot of new ideas should be created under the critical situation we will face after the big impact happened there and the big destruction occurred on all levels of life like poverty, homelessness, changes in the behavior of the Syrian people especially the children and many other objectives should have a new idea to deal with the new destroyed country and how to rebuild everything in a modern way where critical thinking is really needed because we need to accelerate rebuilding the country as fast as we can under critical situations.

## **General Recommendations**

I will present some advice:

There are three aspects of a diplomatic setting :

- Membership
- Bolt and group development
- International institutions.

For example membership in diplomacy is in direct relation with the United Nations, International Monetary Fund, and the international bank for reconstruction.

The expansion of membership in diplomacy has the following effects:

- The entry into force of conventions
- The operation agenda and procedure of the international situations.
- The emergence of a variety of United Nations management styles.

The aspects of the modern diplomacy process are noted as a basis for drawing to a close and setting the scene for further analysis.

The diplomatic process is a fusion of domestic and foreign policy.

One of the interesting issues of studying diplomacy development is open and secret diplomacy.

Modern diplomacy is in practice conducted on the basis of secrecy.

In international relations, we can get the result that the extent of secrecy has been influenced by the level of violence in the international system.

The diplomatic profession officers should coordinate with security and intelligence officers for secret diplomacy. That is why we consider the diplomacy profession has never been safe and this should be respected by the international governments and the international community
